

## Solution Brief

# Superior Protection with CrowdStrike and Triangle Cyber

Get immediate, effective detection and prevention against all types of attacks with the industry-leading CrowdStrike Falcon® platform and managed services from Triangle Cyber

## Challenges

### Increasing Complexity

The threat landscape is ever-evolving, attackers are developing sophisticated approaches targeting organizations large and small, and attacks have become more sophisticated. Traditional legacy antivirus (AV) solutions are not enough, and traditional endpoint security solutions are notoriously complex, requiring significant resources to deploy, configure and manage.

### Limited Resources

Implementing and properly configuring endpoint technology according to a customer's security needs can be complex and require investment in costly and scarce resources. Once deployed, the task of managing alerts and identifying notable incidents for response can be operationally challenging.

### Slow Triage and Remediation

Lack of real-time visibility into what is happening can make it difficult to quickly determine the nature and scope of a threat and properly and immediately respond to an incident.

## Solution

A CrowdStrike-powered managed service delivers a comprehensive endpoint security solution that provides the highest level of protection for your organization. Reduce overhead, friction and cost with CrowdStrike's cloud-native and single agent platform, and receive the most comprehensive endpoint protection available today for detecting and stopping all types of attacks at scale. Get the support you need to effectively and seamlessly investigate, remediate and defend against sophisticated cyber security threats with CrowdStrike and Triangle Cyber

# Why CrowdStrike-powered managed services

## Strong Protection

Benefit from immediate, effective prevention against and detection of all types of attacks—both malware and malware-free—regardless of whether endpoints are online or offline with the CrowdStrike Falcon® platform powering Triangle Cyber

## Unrivaled Visibility

Mitigate blind spots with improved visibility across your endpoints, workloads and identities. The Falcon platform helps to discover and investigate current and historic endpoint activity in seconds and initiate fast, effective remediation through Triangle Cyber

## Rapid Delivery

The cloud-delivered Falcon platform is easy to deploy, configure and maintain — all via a single, lightweight agent — to ensure faster and more effective protection of your assets, which can be quickly and seamlessly deployed and delivered by Triangle Cyber

## About CrowdStrike

**CrowdStrike** (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: **We stop breaches.**
